Human Nutrition, Environment and Health

October 14–18, 2015
China World Hotel | Beijing | China

Scientific Organizers: Martin Kussmann, Hannelore Daniel and Jacqueline Pontes Monteiro

Organized in collaboration with BGI. Part of the Keystone Symposia Global Health Series, supported by the Bill & Melinda Gates Foundation.

Diet is the most important environmental factor for maintaining health and preventing disease. The goals and outcomes of this meeting include: 1) Bringing together researchers from traditionally rather separated disciplines: nutrition, (gen)omics, clinics, physiology, epidemiology, analytics, biomathematics; 2) Advancing nutrition research as a quantitative, holistic and molecular science; 3) Reviewing/challenging classical pre-clinical models and clinical study designs and incorporating improved translational in vitro and in vivo models, human intervention study designs, and innovative new tools/technologies for molecular phenotyping and capture of human diet and lifestyle; and 4) Connecting basic laboratory science to patient- and consumer-relevant outputs in terms of personalized dietary/nutritional counseling and monitoring/diagnostics.

Session Topics:
• The Interaction between Human Genome, Diet and Environment
• Translational Models for Human Nutrition and Health
• Human Nutritional and Lifestyle Interventions
• Capturing and Monitoring Human Individuality
• From Nutrigenomics to Systems Nutrition
• Nutrition 2.0 – Translation into Solutions for Human Health
• Global Nutrition and Sustainability
• Joint Session with Grand Challenges and Keystone Symposia plus one workshop

Note that special subsidized registration rates are available to meeting participants in China.

Special registration rates are available for participants in China.
Note that abstracts can continue to be submitted online through the discounted registration deadline, and you can register up until the meeting begins.

Discounted Registration Deadline: September 10, 2015
For additional details, visit www.keystonesymposia.org/15T1.
KEYSTONE SYMPOSIA
on Molecular and Cellular Biology

Human Nutrition, Environment and Health (T1)
October 14-18, 2015 • China World Hotel • Beijing, China

Scientific Organizers: Martin Kussmann, Hannelore Daniel and Jacqueline Pontes Monteiro
Organized in collaboration with BGI. Sponsored by Nestlé Institute of Health Sciences. Part of the Keystone Symposia Global Health Series, supported by the Bill & Melinda Gates Foundation.

WEDNESDAY, OCTOBER 14
Arrival and Registration

THURSDAY, OCTOBER 15
Welcome and Keynote Address
*Martin Kussmann, Vydiant, Switzerland
*Jacqueline Pontes Monteiro, Universidade de Sao Paulo, Brazil
*Hannelore Daniel, Technische Universität München, Germany
José M. Ordovás, Tufts University, USA

Human Health, Genes and Diet

The Interaction between Human Genome, Diet and Environment
*Martin Kussmann, Vydiant, Switzerland
Claudio Franceschi, University of Bologna, Italy
Genes and Environment for Human Longevity
Leroy E. Hood, Institute for Systems Biology, USA
Systems Medicine and Proactive P4 Medicine: Transforming Healthcare and Nutrition through Wellness
Liping Zhao, Shanghai Jiao Tong University, China and Rutgers University, USA
Dietary Modulation of Gut Microbiota for Obesity Management: From Association to Causation to Translation
Alexandar M. Vaiserman, Institute of Gerontology, Ukraine

Short Talk: Developmental Nutritional Programming of Type 2 Diabetes: Evidence from the Ukraine Famine of 1932-1933

Translational Models for Human Nutrition and Health
*Kendal Hirshci, Baylor College Medicine, USA
Vijayalakshmi Varma, National Center for Toxicological Research, FDA, USA

Adipocyte Responses to Fructose: A Characterization Using Systems Biology Approaches
Aldons J. Luisis, University of California, Los Angeles, USA
Systems Genetics Analysis of Host-Gut Microbiota Interactions
Patrick J. Stover, Cornell University, USA
In Search of a Common Pathway for Folic Acid-Responsive Neural Tube Defects, Neurodegeneration and Cancer
Sumei Hu, Institute of Food and Health, University College Dublin, Ireland
Short Talk: The Impact of Milk Derived Bioactives on Glycemic Management

Poster Session 1

FRIDAY, OCTOBER 16
Human Nutritional and Lifestyle Interventions
*Patrick J. Stover, Cornell University, USA
Hannelore Daniel, Technische Universität München, Germany

Characterising Normal Human Metabolism
Ben van Ommen, TNO, Netherlands
Diet, Systems Flexibility and My Optimal Health

Jacqueline Pontes Monteiro, Universidade de Sao Paulo, Brazil
The Genomics of Micronutrient Requirements
Robert Zeigler, IRRI, USA
Rice as a Tool to Improve Nutrition for the World’s Poor
Marie-Pier Scott-Boyer, University of Trento COSBI, Italy
Short Talk: Network-Based Analysis of Cofactor-Protein Interactions in Nutrition and Complex Diseases
Namita Parikhshit Mahalle, Deenanath Mangeshkar Hospital and Research Center, India
Short Talk: A Study of Nutritional Factors and its Relation with Insulin Resistance and Inflammatory Markers in Patients with Coronary Artery Disease in Indian Population

Capturing and Monitoring Human Individuality
*Chris Evelo, Maastricht University, Netherlands
Qiang Tian, , USA
Wellness, Diseases and P4 Medicine
Rui Chen, Stanford University, USA
Longitudinal Omics in Humans
Rick Weiss, Viocare, Inc, USA
Self-Monitoring of Diet and Lifestyle
Karsten Hiller, University of Luxembourg, Luxembourg
Short Talk: Combining Dried Blood Spots with Stable-Isotope Tracers to Profile Dynamics of Glucose Metabolism in Human Subjects

SATURDAY, OCTOBER 17
From Nutrigenomics to Systems Nutrition
*Jim Kaput, Nestlé Institute of Health Sciences, Switzerland
Martin Kussmann, Vydiant, Switzerland
Omics-Rooted Systems Studies of Human Phenotypes
Lorraine Brennan, University College Dublin, Ireland
Metabotyping in Nutrition Research
Mariana Radonjic, EdgeLeap, Netherlands
From Disconnected Data to Emerging Insights: Unraveling Complexity of Food-Health Interactions
Paloma K. Barrera, INMEGEN, Mexico
Short Talk: Antioxidant-Related Gene Expression Changes by Cocoa Polyphenols Intake
Xiaojie Tan, Waters, China
Short Talk: Markers of Health: Molecular Phenotyping Unveils the Healthy Biosignature of “Omega-3” Transgenic Mice

Nutrition 2.0 - Translation into Solutions for Human Health
*Jacqueline Pontes Monteiro, Universidade de Sao Paulo, Brazil
Juan B. Ochoa Gautier, Nestle Health Science S1216, USA
Personalized Nutrition in Critical Care
Xu Lin, Shanghai Institutes for Biological Sciences Chinese Academy of Sciences, China
Genetic Variants, Nutrient-Related Biomarkers on Metabolic Diseases in Chinese
Maria-Carolota Dao, Institute of Cardiometabolism and Nutrition, ICAN, France
Gut Microbiota and Cardiometabolic Risks

* Session Chair † Invited but not yet accepted  Program current as of January 20, 2021. Meal formats are based on meeting venue.
For the most up-to-date details, visit https://www.keystonesymposia.org.
**Poster Session 2**

**Global Nutrition and Sustainability**

*B* Ben van Ommen, TNO, Netherlands
Jim Kaput, Nestlé Institute of Health Sciences, Switzerland
Nina V. Fedoroff, Pennsylvania State University, USA

*Enabling Nutrient Security and Sustainability through Systems Research*

**Panel Discussion: Perspectives and Needs for research in the Food, Diet and Health Relationship**

*M* Martin Kussmann, Vydiant, Switzerland
Jim Kaput, Nestlé Institute of Health Sciences, Switzerland
Ben van Ommen, TNO, Netherlands
Lorraine Brennan, University College Dublin, Ireland
Claudio Franceschi, University of Bologna, Italy

**Meeting Wrap-Up: Outcomes and Future Directions (Organizers)**

**Workshop**

*Jacqueline Pontes Monteiro*, Universidade de São Paulo, Brazil
G. Bhanuprakash Reddy, National Institute of Nutrition, India
Padmapriyadarsini Chandrasekaran, National Institute for Research in Tuberculosis, India
Neil A. Hanchard, Baylor College of Medicine, USA
Shuxin Han, Case Western Reserve University, USA
Efrat Monsonego Ornan, Hebrew University of Jerusalem, Israel
Abena S. Amoah, Noguchi Memorial Institute for Medical Research, Ghana
Edwin Andres Higuita, Corporación Universitaria Remington, Colombia

*Influence of Micronutrients on Biochemical Pathways Involved in Diabetic Complications*

*Dietary Intake, Nutritional Status and Relationship to Serum Lipids among Antiretroviral Naïve HIV-Infected Children in South India*

*Dna Methylation Changes in Severe Childhood Malnutrition*

*Circadian Control of Bile Acid Synthesis by a KLF15-Fgf15 Axis*

*Nutritional Aspects of Skeletal Development*

*Breastfeeding Duration and Asthma in Urban Schoolchildren in Ghana*

*Immunomodulation of T Cells Subpopulations and NK Cells in Elderly Adults during a 12 Weeks Intervention with a Nutritional Complement Enriched with Biotechnologically Ganoderma lucidum Extracted Beta Glucans (ISRCTN 53126301)*

*Metabolomic Signatures of Obesity and Diabetes Revealed in Corresponding Genetic Mouse Models*

**Joint Session with Grand Challenges and Keystone Symposia**
